

Half-day detour on Reservoir Road – August 24th

There will be a five-hour detour on Reservoir Road on Monday, August 24th beginning around noon, and ending at about 5 pm. This detour will allow the Town's utility contractor to finish one of the last underground elements of the construction project. As with previous detours, signs will be in place to redirect drivers away from Reservoir Road.

Construction to install a sewer line to connect Coventry High School to the sanitary sewer system, and to replace Kent County Water Authority's water line is winding down. The final paving of Tiogue Ave, Reservoir Road, and on the high school property will be done in late fall – after giving the underground utility work a chance to settle. Other than the detour on August 24th and the detour to be scheduled in the fall for paving – there are no detours on Reservoir Road.
