**Re: Preliminary Plan Application - Moo Cow Solar, Revisions
2446 Victory Highway (Route 102)
AP 304, Lots 27.1 and 28
TRC Project No. 500563.0000.0000**

Dear Mr. McLean,

TRC Engineers, Inc. (TRC), on behalf of EDP Renewables NA Distributed Generation LLC (Applicant), is pleased to submit the revised site plans and associated materials for Preliminary Plan Application for Major Development approval of the Moo Cow Solar Project. The subject project is located on land mapped as Lot 28 (Owner: Moo Cow LLC) and 27.1 (Owner: NARYA LLC). This project has received Master Plan approval from the Planning Commission on May 30, 2023, a Special Use Permit from the Zoning Board on August 2, 2023. Please find enclosed the following revised application materials:

1. Stormwater Report
2. Sedimentation and Erosion Control (SESC) Plan
3. Site Plans, prepared by TRC and revised dated April 24, 2024
4. Visual Assessment dated March 12, 2024
5. PV Safety Training for First Responders – Course Information, prepared by Energy Response Solutions shared with Western Coventry Fire District on April 22, 2024
6. Abutter List

As discussed with you and the Western Coventry Fire District (WCFD), we have included a fire access road through the solar array to allow access of fire apparatuses to the other side of the solar field. Furthermore, a proposed 10,000 gallon cistern has been noted on the permit plans and will be coordinated with the Town of Coventry and the WCFD, at the time of construction.

We look forward to presenting these materials at the next public hearing. Please feel free to call me at 401-330-1223 or email me at JSzczepanski@trccompanies.com with any questions or comments.

Sincerely,
TRC Engineers, Inc.

Jack Szczepanski, PhD
Project Manager, Senior Ecologist of Planning, Permitting and Licensing
